Functional Features

Robot manufacturing

Mechanical intelligence, stable taste and fast production, precise program control; Non-contact production, food safety, efficient and intelligent; Robot standardized production, automatic production, multi-level taste buds enjoy.

24H business

Robot production, integrated process, eliminating the traditional physical ice cream shop location, labor and other high expenses, saving costs, to ensure business hours.

Value-added advertising

Equipped with a large-screen advertisement machine, it can play advertisement menus and other marketing contents, and also provide value-added advertisement services: advertise products on the LED screen to increase the economic benefits of the equipment.

Eye-catching

Simple style,with a closed pavilion design, extremely beautiful; Ice cream is made on the spot, Enjoy a panoramic view of the ice cream making and material feeding What you see is what you experience

Convenient and fast

Support touch operation, scanning QR code to order, domestic support for WeChat, Alipay payment, foreign support for card, coins and bills and electronic payment.

Intelligent management

A powerful background management system with clear and easy management of sales revenue and costs. Product types, pictures, prices, and public activities management.

A variety of flavors

Personalized customization, change on demand according to the scene and customer needs, the appearance color of the product can be customized.ice cream sauces can also be customized to suit popular flavors.

A wide range of scenarios

Equipped with universal wheels, it can be moved flexibly and can be applied in a variety of scenes, such as airports, subway stations, pedestrian streets, shopping centers, schools, canteens and other places where people gather.

After-sales service

Provide professional and multi-channel after-sales service to customers, with a one-year quality assurance, software and hardware service support, dedicated training for use and maintenance, online technical expert answers, and worry free after-sales service

BORN INTERNET CELEBRITY!
A EQUIPMENT = A PREMIUM ICE CREAM SHOP!

Small size, large capacity。RobotAnno new generation of AI ice cream Master - Closed robot ice cream kiosks, one-click intelligent manufacturing, the next outlet in the ice cream industry! Portable kiosk, covering only 1 square meters, powerful; One-click ordering, intelligent operation of mechanical arm, visual process; Simple design, eye-catching; Rich in flavors, original pulp, six types of jam, basic pairing with 21 ice cream flavors, can also customize more flavors, freely combine! Self-service order operation, multiple payment methods; 24 hours automatic cleaning fresh-keeping sterilization, safety and health, fast production, 30 seconds to feel cool summer, delicious enjoy!

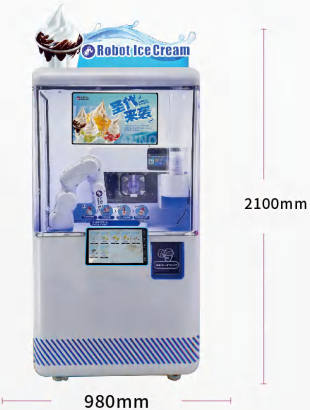
PRODUCT DATA



Robot Ice Cream
圣代来袭
1230mm

DETAILED PARAMETERS

Model	RR-C-SJAN03-02
Sizes	Length 980mm*Width 1230mm* height 2100mm
Number of robotic arm axes	six-axis robot
Equipment weight	420 kg
Order Pick-up Counter	one independent meal pick-up counter
topping variety configuration	10 options (with customizable flavors)
cup-style	260 ML
Cup caliber	90 MM
Cup bucket capacity	200 Pieces
Cup dropping machine	2 Sets
production time	30 S
maximum one - time feeding amount	18 L
Total machine power	2000W Peak

Advertising machine size	27 inches
Single order screen size	13.3 inches
runtime	365 days 24 hours continuous operation
productive power	One - time full - load feeding can produce 70 cups
Payment Method	China supports WeChat, Alipay, etc, Payment methods such as card swiping, paper currency, and coins can be provided abroad.
display function	Ordering Screen、Advertising Player、LED Screen Advertising Display
Intelligent Reminder	fault reminder
Backend Management System	Multidimensional Data Management
Product settings	PC and mobile backend management
Remote contro	Mobile remote monitoring

Summer Heat Relief Tool!

Unique flavor of sundae ice cream!!

Sundae
launch

Orange Sundae

Pineapple Sundae

Strawberry Sundae

mango Sundae

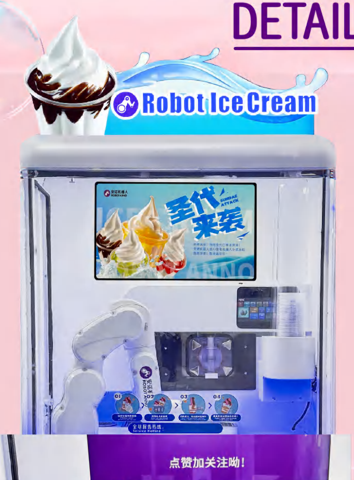
Honeydew Melon Sundae

Chocolate Sundae

Unique flavor of sundae ice cream!

6 types of jam, 2 crushed fruits, over 21 flavors to choose from!

DETAIL ADVANTAGES



Mechanical intelligence, stable production

Fully mechanized, with stable taste and quick production; Multi module collaboration ensures food safety! Diverse flavors, mellow taste, experience the taste buds of the new generation!

安诺机器人
ROBOTANNO

Fashionable appearance, eye-catching

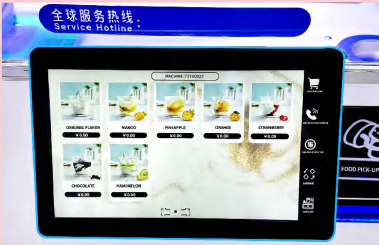
Colorful lighting, cool robotic arm, minimalist design, and a panoramic view of the entire ice cream making process, providing a novel experience that attracts crowds to gather. Stop and take photos! A new generation eye-catching tool with built-in internet celebrity attributes!

Independent small material area

Safe and hygienic, independent small ingredient area, equipped with a variety of jams, diverse flavors, and support customization! Fully enclosed workshop, ensuring safe and reliable ice cream production!

convenient and fast

It is equipped with a large screen, single screen, touch operation, code scanning payment, WeChat Alipay and other payment methods in China, and swipe card, coins and banknotes and other payment methods in foreign countries, which are convenient and fast!



Application scenarios

New upgrade, 70+countries/regions, 500+partners

Won the three major professional quality certifications of EU CE, US FCC, and China ISO9001

60+National Patents/Maker China Excellent Team/National High tech Enterprise

Our clients cover over 70 countries worldwide, including China, the United States, Britain, Germany, France, Japan, and Australia, and can be applied to office buildings, shopping malls, and more

Various scenes such as schools, airports, hotels, bookstores, technology parks, canteens, exhibitions, and neighborhoods.

- Offices/office buildings
- Pedestrian streets
- Attractions/parks

Refacting the chain ice cream business model

Pain points of chain ice cream

Difficulty in hiring large chain workers
Rich categories, difficult training
Fatigue strength increases, quality assurance is difficult
Chain store leading replication is difficult
Difficulty in manually controlling food safety

Advantages of Robot Ice Cream Machine

7 * 24 replacement for manual operation
One click backend upgrade standardization
High repeatability ensures consistency of actions
Modular customization, full service coverage
Fully automatic mechanical operation with zero contact

Comparison of Investment Returns

	Traditional ice cream industry	Anno Robot Ice Cream Machine
Store opening cost	30W-50W The decoration cost is high and the investment is large	10W-12W No decoration required, movable, no risk during peak and off peak seasons
labor cost	Professional ice cream maker, 20000 RMB per month+	5000 yuan/month, one person can manage multiple devices
rent	Covering an area of 10 ㎡ -50 ㎡, with high rental fees	Covering an area of 2-3 square meters, only 10% -20% of the traditional store is needed
product quality	Employees' skills, emotions, and states All of these will lead to deviations in taste and appearance	Unified process standards, consistent taste and appearance
product efficiency	1-2 minutes, inexperienced and skilled hands have poor efficiency Large distance, defective products need to be remade	24-45 seconds, efficient and stable
Business Hours	8-10 hours	24 hours
Monthly profit	Sell 200 cups per day, with a monthly profit of around 12000 yuan -10 hours	Sell 200 cups per day, with a monthly profit of around 30000 yuan

Single cup cost comparison: low investment, high return

	Ice cream shop has a large investment	Anno Robot Ice Cream Machine with Small Investment
material cost	About 1-2 yuan (high loss and waste)	About 1-2 yuan (precise production)
Manual allocation	About 1-2 yuan	About 0.1 yuan
Rent, utilities	About 4 yuan	About 0.5 yuan
Depreciation maintenance	About 2 yuan	About 0.5 yuan
Store lifespan	2-3 years (1 year old, 2 years broken, 3 years demolished)	10 Years
assess the cost	Minimum of 8 yuan or more	Around 3 yuan
shortcoming	Employees cannot remember and make many mistakes Serious waste, low return on investment Unstable product and potential food safety hazards	Product stability, consistent taste, excellent stability Service standards are efficient, waste free, and loss free High return on investment, ensuring food hygiene

BACKEND SYSTEM

Powerful background management program,
the features include Inventory management, Order management,
Data center, Alert notice, Product database, Machine management,
Record ofoperation,Route management.
to help you better go to business adjustments!

RobotAnno (Shenzhen) Co.,Ltd.(brand name: RobotAnno) was established in April 2017. It is a national high-tech company focusing on the research and development,production,sales and service of desktop-level robotic arms and AI robots for smart unmanned retail solutions. enterprise.Drivenby artificial intelligence technologyand using "easy-to-operate,high-performance,diversified" desktop-level roboticarms as a carrier, through integrated solutions,we helpcustomers solve bottlenecksthat restrict the future development of enterprises such as manpower shortagesand rising labor costs.Anno Machinery products have obtained more than 70national patents.The products are sold in more than 1oo cities in China and morethan 70 countries and regions around the world. They occupy a considerable market share in the global desktop-level robotic arms and AI robot smart retail markets.

Adhering to cutting-edge innovative technology, and leveraging continuous independent R&D capabilities as well as an international perspective, we continuously promote the wide application of robots in education, light industry, and particularly in the commercial sector. "Robot + retail intelligence" represents a disruptive trend in the future of business. Anno utilizes advanced robotic technology to provide integrated commercial intelligent solutions for enterprises' comprehensive digital transformation, and creates broader business prospects for the future beverage industry.

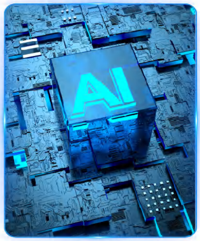
After-sales center six support

Customer service hotline support:

Official website customer service, WeChat public number, WeChat group, after-sales phone and other multi-channel after-sales support;

Software support:

Software can be operated remotely, and support software upgrade services, can be found in a timely manner in the use of the problems and pitfalls, to complete the simultaneous updating of equipment to ensure that the equipment has the latest features and best performance.



Hardware support:

Free replacement of core components within the warranty period, video or text guide replacement, can also support the return to the factory to repair; also equipped with detailed after-sales video and instruction manual guidance;

Training support:

Support for training in the factory or through video, conference, text and voice and other forms of training, to understand the operating principles of the equipment, the use of methods and repair and maintenance.

Maintenance warranty:

Commitment to a one-year warranty, lifelong maintenance; at the same time configured with various types of maintenance accessories to ensure that the first time can quickly deal with the problem.

Technical expert support:

Technical experts online real-time answers and problem diagnosis, after-sales engineers more than one service to help users quickly locate the fault, maximize the protection of the efficiency of the equipment, worry-free after-sales.
